EXPERIENCE

Si Supplies | Full Stack Developer

October 2023 – August 2024 | January 2025 – December 2025

- Developed a **QuickBooks Online API** integration using **REST APIs**, **OAuth 2.0**, and **PHP**, syncing live inventory, orders, and customer data across **100+ accounts** and **hundreds of products** between in-store and online platforms
- Built internal tools using **React** and **Electron** to manage inventory/customer data, improving operational efficiency
- Integrated **Net 14/30/60 payment terms and credit limits** from QuickBooks using **PHP**, enabling approved accounts to purchase on credit and track outstanding balances through the website.
- Implemented **role-based access control** restricting pricing visibility and order placement to admin-approved users.

Kenna Technology Solutions | Full Stack Application Developer

September 2024 – December 2024

- Implemented **UI/UX** design based on user feedback, enhancing usability and engagement
- Developed and optimized **RESTful APIs** using **NodeJS** and **ExpressJS**, reducing response times by **25%**
- Designed **SQL** database tables to improve query performance and data integrity, increasing system efficiency
- Engineered responsive front-end components with **React** and **Redux**, reducing initial page load time by **20%**.

RELEVANT PROJECTS

Large Language Model Analyzer

April 2025

- Developed a full-stack AI chat application enabling sub-second real-time messaging using **React.js**, **Node.js**, **Express.js**, **MongoDB**, and **Socket.IO**
- Integrated **Claude-3.5**, **GPT-4o-mini**, **o3-mini** and others, using **Few-Shot**, **Chain-of-Thought**, and **Role-based prompting** to boost response relevance
- Secured authentication with **bcryptjs**, **OAuth 2.0**, and **Google APIs**, benchmarking model performance with **BLEU**, **ROUGE**, and **F1 scores**

License Plate Detector Software

November 2024

- Built a **Python** video processing pipeline combining **YOLOv8 object detection** and **SORT tracking**, automating live license plate annotation and **CSV export**.
- Trained a custom **YOLOv8** model on **22,000 images** via transfer learning, achieving **30%** lower detection loss and **90%+ plate text accuracy** with **EasyOCR** preprocessing

TMusic

May 2024

- Developed a music-social app enabling real-time song sharing using **PHP**, **Laravel**, **React.js**, and **Spotify**, **Pusher**, and **Google OAuth APIs** across **3** integrated platforms.

LEADERSHIP EXPERIENCE

Competitive Programming Club

Toronto, ON

Toronto Metropolitan University (Previously Ryerson University)

April 2022 – May 2025

- Orchestrated weekly coding competitions and technical interview prep workshops using **Java** and **Python** boosting member problem-solving speed by **30%**

EDUCATION

Toronto Metropolitan University (Previously Ryerson University)

Toronto, ON

B.Sc. – Computer Engineering | Software Specialization

May 2025

- Related Coursework: Data Structures & Algorithms, Database Systems, Network Security, Software Testing & QA

SKILLS

Languages: Java, JavaScript, Python, PHP, SQL, C/C++, HTML/CSS, Assembly, VHDL, Bash

Frameworks/Technologies: React, Node.js, Laravel, Git, Jira, Electron, MongoDB, Next.js, JUnit, Express.js

Skills: API Creation, State Management, Agile & Sprint Methodologies, Prompt Engineering, Computer Vision
